

Dynatrace Austria GmbH

Software und IT

Dynatrace was founded in Linz in 2005 and is the leader in AI-powered unified observability and security. The vision: software needs to work perfectly all over the world. On the way to the autonomous, self-healing, and self-protecting cloud, Dynatrace helps the world's largest organizations to create perfect digital solutions with AI-driven, answer-based automation. Dynatrace detects emerging issues and security vulnerabilities in software or IT infrastructures in real time and can trigger automated healing processes. Using artificial intelligence and complete automation, the company ensures that software runs frictionless. Digital user experience is improved, and new business models can be realized more quickly. Millions of people benefit from this every day in the age of digitalization: when banking, traveling, shopping, working on the go, or in the health sector. Dynatrace has been listed on the New York Stock Exchange since 2019. The company is headquartered near Boston in Waltham/Massachusetts in the USA. The technological and creative heart of software development at Dynatrace beats in Europe: Linz is the company's global engineering headquarters with additional engineering locations in Hagenberg, Graz, Klagenfurt, Vienna, Innsbruck, Barcelona, Gdansk, Tallinn, Tel Aviv, Brno and Detroit. In total, more than 5,200 people work at Dynatrace. In fiscal year 2025 total revenue amounted to \$1.699 billion.
